ABSTRACT

Milwaukee Area Technical College (MATC) initiated summer evening classes during summer 1985. In June 1985, a study was conducted to evaluate the functions, services, and facilities of the summer school and to develop a profile of MATC summer students. A random sample of 1,609 (38.5%) of the 4,183 students enrolled in summer 1985 were surveyed in-class by their instructors. Study findings included the following: (1) a majority of students at all campuses were female, with a high of 73% female among North Campus day students; (2) the three most important reasons for attending at all locations were to earn an associate degree, acquire skills for a new job, and earn transfer credit; (3) approximately 35% of the students at Milwaukee Campus were minority group members, compared to 9.5% at South Campus, 14.1% at North Campus, and 14.6% at West Campus; (4) about 20% of the day students and 60% of the evening students were working more than 34 hours per week; (5) campus choice was influenced most by low costs and convenient location; (6) highest ratings were given to the following items: "the manner in which I have been treated," "the quality of teaching I have received at MATC," and "the courses I have taken at MATC." The survey instrument and responses by campus and day/evening status are included. (LAL)

REPORT OF THE STUDENT EVALUATION OF THE MILWAUKEE AREA TECHNICAL COLLEGE 1985 SUMMER SCHOOL

INTRODUCTION

MATC initiated summer evening classes during the summer of 1985. To evaluate the effectiveness of MATC summer classes, a survey of a sample of the 4,183 summer school students was conducted by the MATC Department of Research, Planning and Development. Day and evening classes were scheduled at the Milwaukee and South Campuses and day classes only at the North and West Campuses.

As part of the continuous evaluation and planning process of the Milwaukee Area Technical College, a sample of students from the Summer School was surveyed in June 1985. The purpose of the survey was to provide a sample of students with the opportunity of evaluating the functions, services, and facilities of the District and provide data to construct a profile of the MATC students attending Summer School. A total of 1,609 students provided usable responses to the survey. This Report is a summary of these responses, while the complete computer-generated results are available in the Research, Planning, and Development Office at the Milwaukee Campus.

Survey Instrument

The survey instrument (see Appendix A) was developed with the aid of recommendations from personnel of all divisions of the Milwaukee Area Technical College. It consists of 19 information and 13 evaluation items covering a broad range of functions, services, and facilities of the District.

The survey was administered to the sample of students by faculty members during regularly scheduled classes. The random sample consisted of 1,609 (38.5%) of the 4,183 students enrolled during the Summer Session of 1985 in Day and Evening classes at the four MATC Campuses.

PROFILE OF SUMMER SCHOOL STUDENTS

Table I shows a summary profile of respondents:

Sex	-	A majority of students at all campuses were females with a high of 73% at the North Day. During the regular school year, females are usually a majority by 3-4%.
Median Age	-	The median age of students ranged from a low of 26 to a high of 29. This is similar to median ages of Evening students.
Reasons for Attending MATC	-	The three most important reasons for attending at all locations in the following order were: Earn an Associate Degree; acquire skills for a new job; and earn credit for transfer.

Ethnic Background	-	About one-third of Milwaukee Campus students were minorities more than 10% of Day students at Regional Campuses were minorities. All ethnic groups are represented at each of the four MATC Campuses.
Handicapped	-	A range of 4 to 6% by campus of all respondents considered themselves physically handicapped.
Employed	-	About 20% of Day students and about 60% of Evening students were working more than 34 hours per week. About 40% of Day students and 20% of Evening students were not employed.
Public Transportation	-	A majority of students drive their own cars to school. Twenty-nine percent of Milwaukee Day students, 9% of West Day students, and 7% of South Day students used public transportation.
First Time Students	-	About 28% of Summer students were attending MATC for the first time.

Some highlights of responses to the Information Questions are as follows:

1. Summer Evening school 1985 enrollment of 1,509 resulted in a large increase 1,211 (40.7%) in Summer School enrollment over 1984. This is the first time in many years classes have been scheduled in the evening. About 25% of Day students were not aware that Evening classes were offered.

2. A majority of MATC students are interested in Associate Degree courses at all Campuses.

3. More than 80% of students at Regional Campuses preferred attending a Regional Campus. About 70% of Milwaukee Campus students preferred attending the Milwaukee Campus.

4. The influence of a parent or relative to attend MATC was the most important for Day students at the Milwaukee and West Campuses, but class schedule or other mailed material was the greatest influence of Evening students and Day students at the North and South Campuses.

5. The cost of classes was the most important reason for students attending MATC at all Campuses except Evening South and Day North where convenient location was the most important reason.

6. A significant percentage of Evening students, 44.2% Milwaukee, and 35.5% South, indicated they would not have attended MATC Summer School if Evening classes were not offered.

Summary of Responses by Campus to each question on the questionnaire are shown in Appendix B.

STUDENTS' EVALUATIONS

Items 20 through 32 of the survey allowed respondents to evaluate a broad range of functions, services, and facilities of the Milwaukee Area Technical College. The students were asked to choose one of the following seven responses regarding the subject of each survey item:

1. Excellent
2. Good
3. OK
4. Poor
5. Terrible
6. Of no concern to me
7. I can't evaluate this

Of concern in developing the schemes for a summary report of responses was the realization that the "omits" and choices 6 and 7 above would dilute the results of those respondents who chose to rate an item; i.e., selected either "Excellent," "Good," "OK," "Poor," or "Terrible."

Accordingly, a simple tabulation and percent-of-total was deemed unsatisfactory for summarizing the selection of these five responses, although it seemed the most appropriate for reporting the "omits" and the "of no concern to me" and "I can't evaluate this" responses. The five evaluative choices were assigned the following numerical values to facilitate summarizations:

Excellent	- 4
Good	- 3
OK	- 2
Poor	- 1
Terrible	- 0

For each item of the survey, an arithmetic mean was calculated based on both the frequency and the numeric value of the evaluative responses to the item. The magnitude of the mean response thus serves as an indicator of the students' satisfaction or dissatisfaction with the aspect of the District being evaluated.

Table II shows the 13 items in rank order from the highest to the lowest mean. The mean ranges from 3.22 for "The manner in which I have been treated by the MATC instructors" to 2.30 "Services provided by Bookstore." Six (6) of 13 items were rated above 2.99 with a majority rating the items excellent or good. For example, as shown in the Summary of Responses, more than 80% of the students responded with excellent or good to the item relating to "the manner in which I have been treated by MATC instructors." About one-half of the students rated the lowest ranked item "Services provided by Bookstore" excellent or good. However at the Milwaukee Campus, 20% of Evening students and 25% of Day students indicated that "Services provided by Bookstore" were poor or terrible.

Table III shows the mean responses to evaluation questions 20 to 32 by Campus. An analysis of the responses by Campus indicates the following:

1. Responses to all questions are mostly positive. Evening students generally give higher ratings than Day students. This is consistent with results obtained in Student Surveys conducted of Day and Evening students since 1972.

2. Responses to all questions are mostly positive at each Campus. Ratings of Day students at Regional Campuses are generally somewhat higher than Day students at the Milwaukee Campus. This is also consistent with previous Student Surveys.

3. Some strengths indicated by student responses are as follows:

   a. The quality of MATC instructors and the manner in which instructors treated students were rated excellent or good by a majority of students. These items received mean ratings of more than 3.0 at all Campuses, Day and Evening (range 3.00 to 3.48).

   b. The courses taken at MATC were rated highly by students at all Campuses Day or Evening (range 3.07 to 3.37). More than 80% rated their courses excellent or good.

4. Some areas of concern indicated by students are follows:

   a. Availability of parking at the Milwaukee Campus.

   b. Public transportation to North Campus.

   c. Registration procedures at Milwaukee Campus, particularly during the day.

   d. Bookstore services at the Milwaukee Campus.

   e. Food service at the Milwaukee Campus in the evening.

   These results are, again, consistent with results obtained in previous Student Surveys.

CONCLUSIONS

The addition of Summer Evening classes was successful and resulted in a significant increase in headcount and FTE enrollments in 1985. Day and Evening students were pleased with instruction and their classes. Evening offerings could be expanded at all Campuses without significantly affecting Day enrollments.

The areas of concern: parking, registration and Bookstore at the Milwaukee Campus; Public Transportation to the North Campus, are concerns which are known and efforts are being made to alleviate these problem areas as soon as possible.
